

**Botanical Name:** *Vitis vinifera* cultivars  
**Common Name:** European Table Grape  
*VYE-tiss vih-nih-FER-rah*

## VINE

Spring

Summer

Fall

Winter

**Family:** Vitaceae  
**Origin:** Caucasus, Asia Minor  
**Climate Zone:** USDA 7-9, Sunset 4-11,14-24  
**Mature Height:** 20-25 feet  
**Mature Width:** 5-10 feet  
**Plant Type:** Deciduous  
**Growth Habit:** Upright, requires support  
**Growth Rate:** Fast  
**Flower Color/Details:** Clusters of tiny, bright green, self-pollinating flowers  
**Flower Season:** Spring  
**Bark:** Redwood brown, flaky  
**Fruit:** Tight-skinned, colorful berries with or without seeds, ripening in late summer to fall  
**Foliage:** Bright green fingered leaves  
**Use:** Table grapes, arbor shade  
**Floral:** Wreaths  
**Wildlife/Beneficials:** Bees, wasps and hornets, birds, squirrels, rodents, opossums, raccoons  
**Deer Resistant:** No, except woody stem  
**Fire Resistant:** No  
**Medicinal Uses/Edible:** Edible fruit  
**Adverse Factors:** Ripening fruits attract stinging insects, rodents, other mammals. Some rootstocks prone to *phylloxera* insect infestation.

**Soil:** Adaptable, with good drainage  
**Exposure:** Full sun  
**Water Requirements:** Low  
**WUCOLS Water Needs:** L L M M M M  
**UC Davis Arboretum All-Star:** No  
**Description:** Seasonal changes make this woody vine an attractive focal point in the edible garden. Plants grow rampantly and must be trained off the ground onto sturdy structures that can bear the weight of vines and fruit.  
**Maintenance:** Plants require specialized planting, watering, pruning, and fertilizing depending on age of vine through the fourth year after planting. Check with local Cooperative Extension Offices and other horticultural sources.
